

INDIAN INSTITUTE OF TECHNOLOGY PATNA

8th Convocation

August 26, 2021

Chief Guest

Dr. Prabhakar Raghavan

Senior Vice-President, Google

Prof. Pramod Kumar Jain

Director, Indian Institute of Technology Patna

8th CONVOCATION

PROGRAMME

August 26, 2021

- ❖ Academic Procession enters
- ❖ Invocation with the National Song and Institute Song
- ❖ Chairman, BoGs declares the 8th Convocation open
- ❖ Chairman, BoGs presents Memento to the Chief Guest and the Director presents memento to the Chairman, BoGs
- ❖ Director presents his report
- ❖ Director awards degree to the students
- ❖ Registrar announces the name of the Institute medal winners
- ❖ Pledge by the degree recipients
- ❖ Address by the Chairman, BoGs
- ❖ Address by the Chief Guest
- ❖ Registrar proposes vote of thanks
- ❖ Chairman, BoGs declares the 8th Convocation closed
- ❖ National Anthem
- ❖ Academic Procession returns

Chief Guest

Dr. Prabhakar Raghavan
Senior Vice-President, Google

Director's Report

Prof. Pramod Kumar Jain, Director, IITP

Dr. Prabhakar Raghavan, Senior Vice-President, Google, and Chief Guest for the day and Dr. Anand Deshpande, Chairman, Board of Governors, IIT Patna, Members of the Board, Members of the Senate, Distinguished Guests, Members of Faculty and Staff, Members from electronic and print media, and dear students, ladies, and gentlemen!

At the outset, I would like to extend a hearty and warm welcome to all of you to the 8th Convocation of the Indian Institute of Technology Patna. In the recently released “India Rankings 2020, NIRF by MoE”, IIT PATNA is positioned 26th among engineering institutions of the country and is positioned at 54th for overall ranking. Further, the Ministry of Education, Govt. of India has initiated ‘Atal Ranking of Institutions on Innovation Achievements (ARIIA) to systematically rank education institutions and universities primarily on innovation-related

indicators. I am happy to say that IIT Patna was categorized in band A of institutions with a rank between 11th to 25th. These indicators have inspired us to reorient our mindset and build ecosystems to encourage high-quality research, innovation, and entrepreneurship.

You are privileged because you have received your higher education at this premier Institute. Before I highlight the activities of the Institute, it is a pleasure to welcome our Chief Guest, Dr. Prabhakar Raghavan. An alumnus of IIT Madras, Dr. Raghavan holds a Ph.D. from U.C. Berkeley in Electrical Engineering and Computer Science. He is one of the foremost authorities on Search and is the co-author of two widely-used graduate texts on algorithms and search: Randomized Algorithms and Introduction to Information Retrieval. He has over 20 years of research spanning algorithms, web search, and databases, authored over 100 research articles, and holds 20 patents, including several on link analysis for web search.

Previously, he served as Vice President of Google Apps, Google Cloud, overseeing engineering products, and user experience. Under his adept leadership, the Apps business expanded from a set of consumer apps to an enterprise solution, which is a major contributor to Google’s Cloud business. He also grew both Gmail and Google Drive past 1 billion MAUs (monthly active users) and introduced many machine intelligence features in G-Suite, including Smart Reply, Smart Compose, Drive Quick Access — each leading to marked improvements in user experience.

It is my honour and pleasure to welcome such a luminary in our midst.

ACADEMICS

Academics

IIT Patna offers six four-year B.Tech Programmes, eight M.Tech Programmes, and three M.Sc. Programmes. All departments offer Ph.D. programme in their respective areas of expertise. Currently, there are 2140 students on the roll; 994 B.Tech. students, 277 M. Tech., 160 M.Sc. students, and 709 Ph.D. students are enrolled in 10 departments of IIT Patna.

This year, IIT Patna is beginning three more 4-year programmes, namely, B.Tech. in AI and Data Science, B.Tech. in Engineering Physics, and BS in Mathematics and Computing.

The institute has signed an agreement for the implementation of the National Academic Depository (NAD). Through the SWAYAM teaching platform, GIAN courses and National Knowledge Network (NKN), the institute has been promoting digital learning.

Laboratories

IIT Patna houses a state-of-the-art experimental facility namely Sophisticated Analytical Instrumentation Facility (SAIF) with the assistance of the Department of Science and Technology, Government of India. SAIF at IITP is currently equipped with equipment like: Single Crystal X-Ray Diffractometer (SC- XRD), High Resolution - Liquid Chromatography Mass Spectrometry (HR- LCMS) having HPLC & UHR-TOF mass spectrometer, and a 500 MHz NMR. SAIF regularly arranges workshops and webinars on different analytical techniques for training the prospective users and students.

Library

The Central Library of IIT Patna boasts a large collection of books (around 26000), e-resources (around 2 lakh), and online database that provides world-class services to the users. The Central Library deftly adapted to the disruptions posed by the covid-19 pandemic and catered to the information needs of faculty members, research scholars, students as well as staff of the Institute by offering a wide range of knowledge-based services and products through the remote access facility.

Continuing Education Programme

Continuing Education Programmes (CEPs) offered by IITP meet the manpower training and knowledge up-gradation needs of the industry, academia, and research organizations and impart knowledge related to the frontiers in science, technology, and management. CEP office has organized 40+ high-quality courses with emerging tools and techniques during 2019-21 and trained 1000+ engineers during this period.

Research – Publications and Projects

During last two years, the Institute has published total 1118 articles which are indexed in Scopus database. The h-Index of the Institute for last five years is 33. IIT Patna has been engaged in research and development projects sponsored by various Government agencies like MeitY, ISRO, SERB (DST), CSIR, TIFAC, and MHRD and Industries like Elsevier, Accenture, DENKA, MRF, and Tata Steel.

In the year 2019-20, 45 sponsored projects worth more than Rs. 20.23 crores have been sanctioned, along with 37 consultancy projects worth Rs. 2.52 crores. In 2020-21, 38 sponsored projects worth more than Rs. 12.43 crores have been sanctioned, along with 23 consultancy projects worth Rs. 1.34 crores.

A Cyberphysical Technology Innovation Hub of Rs 110 crores and NIDHI TBI of Rs 11.60 crores were sanctioned during FY 2019-20. Impacting Research Innovation and Technology (IMPRINT) is an MoE

supported Pan- IIT and IISc joint initiative to address the major science and engineering challenges that India must address and champion inclusive growth and self-reliance. IIT Patna is handling 10 projects worth Rs. 6.66 crores.

Some of the notable research centres and facilities at IIT Patna include Technology Business Incubator (TBI), Centre for Earthquake Engineering Research, Pandit Madan Mohan Malviya National Mission on Teachers and Teaching (PMMMNTT) for Internet- of-Things, Sophisticated Analytical Instrumentation Facility (SAIF) Centre, Centre for Endangered Language Studies, Elsevier Centre of Excellence for Natural Language Processing, CDAC-IIT Patna Centre on Digital Forensic, etc.

Institute faculty is quite active in organizing conferences and seminars on topics of national/international importance. In 2019-20, 12 conferences/workshops were conducted and in 2020-21, 19 conferences/workshops were conducted by the departments. In the last two years, 42 patents were filed, out of which 5 patents were granted. Similarly, 3 designs were filed and 3 were granted.

Under the Scheme for Promotion of Academic and Research Collaboration (SPARC) initiative, MoE has contributed to the research ecosystem by academic and research collaborations between IIT Patna and the best institutions in the world from 3 nations- United Kingdom, Portugal, and Denmark. Currently, 3 projects under SPARC are running. Under the Global Initiative for Academic Networks (GIAN), MoE provided support for participation of eminent foreign professors in delivering short-term courses in IIT Patna. IIT Patna is organizing 28 GIAN Courses. 23 GIAN courses have been conducted so far and 5 are in the pipeline.

Incubation Centre IIT Patna

Incubation Centre IIT Patna is set up to promote innovation and entrepreneurship in the broad area of Electronic System Design and Manufacturing and Medical Electronics, with a funding of Rs 47.10 Cr from Ministry of Electronics and Information Technology (MeitY) and IT Department, Government of Bihar. IC IITP has supported 50+ companies so far and more than 10 companies launched their products in the market. Many of them are witnessing good progress and a few have achieved multi-crore turn-overs.

IC companies have done a commendable job in Covid times with creating innovative and successful solutions enabling/facilitating disinfection, tele-consultation, health-care access and tools for the safety of healthcare professionals. Mentors at Incubation Centre include eminent faculty members from IIT Patna, IIT Madras, IIT Bombay, King's College London, AIIMS Patna and include successful CEOs and industry experts from various domains. IC keeps on striving to forge new industry and academia partnerships for the benefit of the incubatees.

STUDENTS' ACTIVITIES

There are several activities and programmes organized by our students all through the year including Nebula, Anwasha (our techno-cultural programme), Reverberance, Entrepreneurship week, etc. During these troubled times of global pandemic, students are engaged through various online activities such as, Act it Out, Desperate Times, Pixxtory and Trigger Tuesday, and Beat it Off. Various quiz events have been organized in house and our students have won laurels at quizzes organized by other institutions like IIT Tirupati, IEST, and Tata to name a few.

Sports facilities are continually being developed for outdoor games like cricket, football, basketball, volleyball, lawn tennis, and indoor games including table tennis, badminton, chess, carrom, and a multi-gymnasium facility is being developed. Despite the challenges posed by the pandemic, the sports unit,

IIT Patna organized several events in 2020 to keep the spirit of the student community high and boost positive energy, motivate the mind and the body to fight all odds and emerge as champions in each and every aspect of life. The sports cell organized Fit India Freedom Run, Celebration of National Sports Day 2020, Celebration of 151st birth anniversary of the Father of the Nation, Mohandas Karamchand Gandhi on 2nd October 2020, Fit India Cyclothon 2020 on 28th December 2020, Republic Day Sports fest 2021 on 26th January 2021, International Women's Day Sports Fest 2021 on 8th March 2021 and Azadi ka Amrut Mahotsav Cycle Rally 2021 on 13th March 2021.

To hone the talents of the students and inculcate values of discipline and team-work, the sports unit at IIT Patna has started the National Sports Organization (NSO) Programme for the First Year B.Tech. students. The students can choose to be a part of either NSO or NSS. The National Social Service (NSS) units and Unnat Bharat Abhiyan Cell at IIT Patna conduct regular activities related to mission-oriented plans of the Government of India like Swachha Bharat Abhiyan and Sarv Shiksha Abhiyan. NSS – IITP has five groups namely Teaching Group, Technical Skills Group, Environment Group, Rural Development Group and Chetna Group. These groups conduct various activities to serve the neighboring villages. Apart from the regular student activities like Research Scholars' Day and National Science Day, the institute conducted a harmony workshop which was a platform for discussing a wide range of practical issues like education, happiness, success, aspirations and gaining an understanding of our relationships, environment, social issues, and self-confidence.

Alumni Relations

The alumni are the stars that adorn the institute's vast sky. It is the alumni who bring repute and fame to any institute. At IIT Patna, SAAR (Students' Association for Alumni Relations) has not just bridged the gap between the students and the alumni community but has also built a relationship with them. Some of our alumni are now faculty members such as Prof. Gagan Deep Singh at the University of Illinois, USA, Prof. Manish Pandey who joined NASIT, Japan in Sept. 2020. A few have joined the Indian Administrative Services and have dedicated themselves to the service of the nation. A few alumni are notable scientists contributing to technological and scientific advancements in their organizations like Observe. AI, Bank of America, etc. The alumni of IIT Patna stand tall as achievers and are a source of pride for the institute.

OUTREACH AND INDUSTRY-ACADEMIA RELATION

Despite pandemic-induced stagnancy in almost all fields of academic activities, IIT Patna has been continuing its zealous outreach endeavours during past two years. We have signed MoUs and continued our intellectual engagement with premier academic institutes as well as corporate houses across the globe. This list includes names like National Informatics Center (NIC), Ministry of IT, GoI., Tomsk State University of Control Systems and Radioelectronics (TUSUR), Russia, Innopolis University, Russia, Kyoto University, Japan, Bombay Stock Exchange (BSE) Institute, and Wiley.

Our students, the flagbearers of our academic excellence have successfully extended and strengthened their global reach through virtual internship programmes in reputed firms such as DE Shaw, Codenation, Google India, Commvault, Goldman Sachs, Intel, iRageCapital, Newzera, Samsung Bangalore, Media.net, etc.

IIT Patna boasts of faculty members who are honoured as Fellow of eminent bodies such as the The Institution of Electronics & Telecommunication Engineers., and Institution of Engineers, India, among others.

Post-Graduation students, research scholars, and faculty members received a number of accolades for their presentations in international conferences and symposiums.

TRAINING AND PLACEMENT

IIT Patna has experienced immense growth in terms of the number of companies visiting our campus for recruitment over the past few years. Moreover, our Training and Placement Cell has swiftly adapted to the challenges posed by the unprecedented pandemic situation. In the year 2019-20 campus placement session, the highest package offered for B.Tech and M.Tech were by Microsoft India Private Limited and by Rakuten (Japan). The PPOs offered to students through their internship have certainly given a boost to the placement numbers, especially in the past year. This session (2019-20) concluded with 202 offers extended by 106 companies belonging to various domains.

The institute witnessed more than fifty new recruiters for the current placement session of 2020-21 wherein B.Tech. students received 93.33% placements with 183 offers. Subsequently, M.Tech. students received 80.39 % placements with 45 offers. Eminent companies exhibited unwavering trust in the potential of our students by extending coveted offers and worthy profiles to the batch of 2020-21. Breaking all the past records, the institute hosted over 125 companies with 239 offers extended to the students. In comparison to the year 2019-20, the overall companies increased by 17.92% in the academic year 2020-21. Similarly, the overall offers for B.Tech. students placed, increased by 18.31% this year as compared to the previous academic year. The institute saw the highest pay package of ₹54.57 lakh per annum by Google India and ₹52.50 lakh per annum by MTX Group for B.Tech. and M.Tech. students respectively.

LAURELS AND DISTINCTIONS OF IIT PATNA FACULTY MEMBERS

The faculty of IIT Patna have shown excellence and received many awards. Dr. Snehasis Daschakraborty (Dept of Chemistry) was awarded the prestigious INSA Young Scientist Award for “significant contributions in the area of dynamics and hydrophobicity in supercooled water”. Dr. Sudhan Majhi and Dr. Maheshkumar H Kolekar were elected as a Fellows of The Institution of Electronics & Telecommunication Engineers. Dr. Subrata Hait and Dr. Sujoy Samanta have been inducted as Fellows of the Institution of Engineers (India) (IEI).

Faculty members have also received Editorial Board Memberships. Dr. Subrata Hait has been appointed as an Academic Editor of PLOS ONE, a journal published by the Public Library of Science (PLOS), USA. He has also been inducted as a Member of the Editorial Board of the SN Applied Sciences, a Springer Nature journal for three years. Dr. Sriparna Saha is appointed as a member of the editorial board of IEEE Internet. Dr. Atul Thakur is appointed as the Associate Editor of the prestigious ASME Journal of Computing and Information Science in Engineering. Dr. Murshid Imam has been appointed as an Editor of the Journal of High Temperature Materials and Processes. Dr. Naveen Nischal has been appointed as an Associate Editor of International Journal OPTICAL ENGINEERING published by SPIE, USA.

INFRASTRUCTURE DEVELOPMENT

Last but not the least, I wish to highlight the development on the campus in terms of the infrastructure. Construction work of about Rs. 450 Crore in Second Phase is in progress and the following are being constructed:

- 1) Academic Buildings, G+5, 2 numbers
- 2) Workshops, 3 numbers.
- 3) Central Lecture Hall, 1 number.

- 4) Central Library
- 5) Guest House, G+2
- 6) Girls Hostel for 232 students capacity.
- 7) Boys Hostel for 950 students capacity.
- 8) Auditorium of 1000 capacity.
- 9) A-type Quarters, G+8, 27 units.
- 10) B-type Quarters, G+8, 36 units.
- 11) C-Type Quarters, G+6, 56 units.
- 12) D-type Quarters, G+3, 48 units.
- 13) Married Accommodations, G+5, 36 units.
- 14) Students activity Center, balance part
- 15) Services like substation, street lighting, WTP, STP, fire-fighting system, water supply distribution network, etc.

From the above, 3 numbers of workshops and 3 blocks of D-type quarters containing total 48 numbers of quarters have been completed. Girls' Hostel of 232 students' capacity and Married accommodation of 36 units are near to completion.

Academic Buildings, Lecture Hall, Guest House, C-type quarters, B-type quarters and A-type quarters are at an advanced stage of finishing. Reinforced concrete work of Boys' Hostel, Student Activity Center are completed and finishing work is in progress.

IN CONCLUSION

IIT Patna is firmly on its way to establishing itself in the league of top institutions and to excelling in its education and research programmes.

I take this opportunity to thank the Ministry of Education, Government of India, and the Government of Bihar for their continued support and faith in us. I would like to thank the Board of Governors who have provided us encouragement and strength to take up new initiatives.

Convocation is a milestone on the way to achieving excellence. You must remember that you the IIT graduates are among the brightest minds in the country and you have been privileged to get your education at one of the finest engineering schools.

Always uphold the values of honesty, integrity, truthfulness, and professional ethics. On behalf of the institute, I extend my heartiest congratulations to batch 2020 and 2021. Make sure you fulfill the responsibilities bestowed on you, make sure you contribute to the nation, and make sure the world keeps on chanting

विश्व का मुकुटमणी आईआईटी पटना
सदा तत्पर सदा जाग्रत पीछे ना जाने हटना॥

“Vishva kaa mukut mani IIT Patna
Sadaa tatpar sadaa jagrat pichhe naa jaane hatnaa”

“Verily is world's jewel in crown IIT Patna
Ever active, ever alert, never ever knows stepping back”

May the motto of IIT Patna “Vidyarthi Labhate Vidyaam” be your guiding star. Knowledge is attained by the one who aspires for it. We are all seekers of knowledge, and only the one who seeks can find it!

Jai Hind

Chairman's Address

Dr. Anand Deshpande **Chairman, Board of Governors,** **IIT Patna**

Honourable Chief Guest, Dr Prabhakar Raghavan, Senior Vice President of Google, Prof. Pramod Kumar Jain, Director, IIT Patna, Distinguished Members of the Board of Governors, Members of the Academic Senate, Members of the Faculty and Staff and the most important guests of today's function, the IIT Patna graduating class of 2020 and class of 2021, Ladies and gentlemen!

Jai Hind, and my warm greetings to all of you!

We are here to celebrate the 8th Convocation Ceremony of IIT Patna amid this unprecedented global pandemic. Despite these difficult times, I am proud of the efforts made by the staff, faculty and students who found innovative ways to continue teaching and keep academic activities going without compromising the quality of learning outcomes.

Thanks to their efforts, we are able to celebrate today's Convocation or the Dikshaant Samaroh. This is a momentous occasion and an important landmark in your academic journey, and I wish you all the very best as you enter the exciting new world of challenges, opportunities and responsibility. I am confident that with the skills and expertise you have acquired here at IIT, you will make a positive difference to the world around you.

IITs have the responsibility to be the fountainhead of knowledge. Knowledge is worthy when it is useful for the common man, and when it leads to innovations that solve society's problems.

IIT Patna has made a breakthrough in this regard by setting up an "incubation centre" for innovating in Electronics System Design and Manufacturing.

I firmly believe that the ongoing drive on "Entrepreneurship and Innovation" that we offer and the new academic degree programs that are launched this year – B. Tech with a specialization in Artificial Intelligence, BS in Mathematics and Computing, B.Tech in Engineering Physics will encourage more students to become entrepreneurs and researchers. Furthermore, IIT Patna is also in the process of starting MBA and BS in Economics.

After shifting to our permanent campus, six years back, IIT Patna is taking small but significant steps towards academic growth and excellence. Apart from academic pursuits, the faculty and students are

engaged in helping the rural community around Bihta through various outreach programs like Adhyayan and Prayatna. I am confident that IIT Patna's contributions to society will continue to grow in years to come.

Due to prevailing conditions of COVID-19, we could not start some of the programmes that were planned, but with improving scenarios, we will be able to start these programs in the next academic session, and I believe new life and vigour will be back on campus soon.

On this occasion, let me extend a warm welcome to all those who have accepted our invitation to be present online. I want to especially thank the parents and the well-wishers of young students graduating today. Without your support, their life would have been more challenging.

It is my privilege to extend my heartiest congratulations to the graduates of the ninth and tenth batch of IITians from Patna. Furthermore, I extend my best wishes and blessings to the students as they join the workforce on their way to become leading technocrats, researchers, entrepreneurs, academicians of the future.

I thank and convey my best wishes to all the other students, faculty and staff members of IIT Patna for their relentless efforts towards seeking excellence.

I am really looking forward to an inspiring and enlightening message from our Chief Guest. I am honoured and delighted that Dr Prabhakar Raghavan, Senior Vice President of Google, agreed to join us for this occasion. At Google, Dr Raghavan is responsible for Google Search, Assistant, Geo, Ads, Commerce and Payments products.

Like all of you, Dr Raghavan is an IITian. He did his B. Tech. from IIT Madras and his PhD in Electrical Engineering and Computer Science from the University of California at Berkeley.

Dr Raghavan is one of the world's foremost authorities on Search and Information Retrieval.

He joined Google in 2012. Prior to his current role, he was Vice President of Google Apps, Google Cloud. Under his leadership, the Apps business expanded from a set of consumer apps to an enterprise solution that is a significant contributor to Google's Cloud business. In 2018 he became responsible for the Ads & Commerce teams, including search, display and video advertising, analytics, shopping, payments, and travel. He has helped drive double-digit growth while remaining centred on longstanding principles of user trust and fair value exchange among users, publishers, and advertisers.

Prior to joining Google, Prabhakar founded and led Yahoo! Labs, where he was responsible for search and ad ranking, as well as ad marketplace design. He also served as CTO at Verity and held various positions over the course of 14 years at IBM Research, working on algorithms.

He has numerous honours and awards to his name. Among them is the 2006 Distinguished alumnus award from UC Berkeley Division of Computer Science and the 2012 Distinguished alumnus award from IIT Madras.

He is a member of the National Academy of Engineering, an IEEE Fellow and an ACM Fellow. We are honoured and immensely proud to have Dr Prabhakar Raghavan, a distinguished scholar and a business leader, amongst us online today. Thank you, Prabhakar, for accepting our invitation. I hope to welcome you to Patna when travel becomes easier.

We are all anxious to hear from you.

Dear graduating students, I present before you our Chief Guest, Dr Prabhakar Raghavan.

Convocation Address

Chief Guest: Dr. Prabhakar Raghavan

Good morning everyone. It is a great pleasure and privilege to be speaking with you today. I want, first and foremost, to offer my heartfelt congratulations to the Indian Institute of Technology Patna graduating students of the 2020 and 2021 batches! It is an honor to join you for the eighth Convocation of IIT Patna.

I would also like to congratulate and acknowledge the proud parents, guardians, family, friends, and mentors who helped make this auspicious day possible. I want to extend my deepest gratitude to the Chairman of the Board of Governors of the IIT Patna Dr. Anand Deshpande, Distinguished members of the Board of Governors, Director of the Institute Prof. Pramod Kumar Jain, Members of the Academic Senate, and Members of the Faculty and Staff. Thank you for inviting me to speak today.

I certainly never imagined I'd be giving a convocation speech from Google's headquarters in California, nearly eight thousand miles away from Patna. And I'm equally certain this isn't the commencement ceremony that you all imagined for 2021. While I wish that you could all be together celebrating safely on campus, I'm honored and grateful for the opportunity to address you from afar, and I am so impressed by your resilience despite the adversities of the past year. I am also certain that the friendships that you've made among your cohort have helped sustain your spirit, and I hope that these are connections you will keep for a lifetime.

IITs are world-renowned for producing incredible technologists and engineers, and one of the most remarkable things about studying at an IIT is being surrounded by some of India's most brilliant minds. To this day, I am still in touch with my graduating class from IIT Madras. We have a Whatsapp group that is quite active, and this past year has brought even more meaningful connections. We saw many messages exchanged among former classmates helping one another — organizing mask deliveries, respirators and oxygen supplies to those in need. I will always be indebted to IIT for creating enduring relationships and life skills like these.

Now... as you all know, Patna is very close to the ancient capital where Siddhartha became an ascetic, eventually becoming the Gautama Buddha. While I can't promise a similarly transcendent experience over the next 20 minutes, I'll try to make it worth your time. When I first spoke with Dr. Deshpande and Professor Jain, they told me that I'm the first convocation speaker for IIT Patna to represent the tech industry. I was humbled... what an honor! It also made me smile for another reason. You see, 40 years ago, almost to this very day, I too was graduating from IIT. And at that time, I never thought I'd end up in tech...or in any industry at all!

I planned to be teaching at a university – and for many years, I essentially did. I could have easily spent my entire life as an academic and never made the jump to industry. But today, I lead a team of over twenty thousand talented colleagues responsible for many of Google's information products, including Google Search and Google Maps - services I hope you all love. That's a far cry from some of my early work, watching silicon chips bake, alone in a corner of a lab...You might be wondering how I got from that sterile lab to this Google office. I wish I could tell you that I got here by being brave, or bold, or throwing caution to the wind, by intentionally taking big risks. But it wouldn't be true.

Taking a step back to reflect, I realize now that my mindset was simply just to look for the next hard problem to solve. Every time that I solved a hard problem, I moved onto a more difficult one. Over and over again. But as I moved through life, with each of these choices, I also started to go beyond certain limits that I had imposed on myself. That brings me to what I want to talk about today: limits. We all face limits – whether they're ones that we place on ourselves, that society places on us, or even the limitations of our own understanding. Staying within those guardrails is often the easiest path to take. But with the gift of time, I can say this: When we work to push beyond those limits...When we instead chase problems with purpose... When we refute others' expectations of us... That's when magic happens. This idea - the idea of reimagining limits - has shaped the course of my life.

It goes back to before I was even born, back to my family and in particular, my mother. My mom trained to be a physicist. But before she studied physics, she was a young girl with a question. One day she was helping wash dishes, and she asked: "Why does water stick to your hands instead of sliding off?" Her grandfather, my great-grandfather, heard her curiosity and recognized her potential. At a time when it was not commonplace for women to pursue higher education, to his credit, he encouraged her to learn more about science and go on to study at university. My mom was one of just three women in her graduating class at a university in Chennai. She got her Masters in Physics, and went on to teach high school. But of course that was not without its challenges. And even though we're now in a different time, we all recognize that societal limitations still persist for many. Quite simply, the world does not extend the same possibilities to everyone.

That's why it would be foolish for me to talk to you today about limitations without first acknowledging that there are some that cannot be shattered alone. In my own example, my great-grandfather encouraged my mom to pursue her passion. My mom and dad supported one another, and helped pave the path for me and my sister, who's also an engineer. And you can imagine, this will continue on. My family experience illustrates something we all know: it often takes more than one person to drive change. We all have that power and responsibility. So I ask you, graduates, as you go out into the world, please consider the unseen barriers facing others around you, and how you can do your part. You'll be surprised at how much change each of you can bring about.

This idea of limits came into play during another pivotal moment in my life, when I was right around your age. Earlier, I mentioned that I had planned to be an academic. After graduating from IIT Madras, I moved to the States to pursue my PhD in semiconductor engineering. I thought I had it all figured out. For many reasons – mostly those in my own mind – my future felt fairly predetermined. Having come from a family of academics and teachers, it had long been imparted to me that academia and the pursuit of knowledge was the most noble profession. So to me, my path forward was pretty clear: Get my PhD, become a professor, make novel contributions to science...hopefully! And for the rest of my life, devote myself to the higher calling of knowledge and education.

I was not unhappy with this. I was content enough with the path that I had laid out before myself. But there were plot twists along the way. When I got to Berkeley to begin my PhD, some of my excessive self-restraint started to crack. The first sign of this was that I started to sit in on some humanities classes – subjects I hadn't studied since high school. I was re-reading poetry, studying Shakespeare. (By the way, Julius Caesar and Hamlet are better than a management course, if you want to learn how not to lead.)

And, in the course of pursuing my PhD, I changed my specialization four times. I tried my hand at semiconductors, then computer-aided design, then computer architecture, finally landing on the theory of computation. Every change felt like a fairly radical shift. I tried out each field for a couple of semesters before moving on to what seemed like a bigger challenge. I eventually settled on the mathematics of

computing for its beauty and depth, and got back on the path to academia. Just as planned. As graduation neared, I began to apply for faculty positions. Just as planned.

But right before graduation, I made another unexpected turn. My friends were all interviewing for industry jobs and told me I should give it a try. Talk about peer pressure. On a whim, I accepted an interview at IBM – despite having never held a ‘real job’ before. I didn’t even have a suit of my own. I borrowed one from a friend! The arms and legs were too short, the shoulders too tight. Today, no one would dare to show up for an interview in tech in a suit and tie – let alone, an ill-fitting one – but hey, it was the ‘80s. And word of advice – if you ever interview at Google, no need to borrow a suit – we might think you got lost on your way to a different interview. A t-shirt or hoodie will do just fine. During that interview, I saw a whole different potential path for my career. I realized that – while I had always thought the noblest cause was academia – I could still pursue science in the private sector, and maybe even at a faster pace. So I took a second look at my plan... to become a professor, to pursue knowledge for knowledge’s sake. And I tossed it out... just two months before I finished my PhD! I moved into industry, where I’ve had a long career, and I now have the privilege of working on products and businesses that reach billions of people. But, interestingly, over the past few decades, my work hasn’t been confined to industry alone.

I’ve also worked with the research community, moonlit as an adjunct professor for over fifteen years, and written two computer science textbooks. My point is this: sometimes, we impose limitations on ourselves. We think we can only do one thing: just academia, or just startups. But what I’ve seen along my journey is something that people rarely tell you, especially when you’re first starting out... You don’t need to do just one thing. You don’t need to be just one thing. Never think that just because you’re getting a degree in a certain major today, or taking on your first job in a particular field or at a particular company, that it defines you for life. You will evolve and adapt over time - so that first choice you make isn’t the end-all. Your future isn’t limited by these things. And that’s good. Your future might even be changed by a speech you hear on the radio! At least, mine was. That brings me to my next story.

This was in the ‘90s. I had two young kids at the time, and they and their friends were obsessed with Pokemon (the first time it was cool!) and Blockbuster Video. But my work colleagues were obsessed with this new thing called Mosaic, the first graphical Web browser. I was driving home one evening when I heard a speech on the radio by the developer of Mosaic, Marc Andreessen. He shared his wild hypothesis that the Internet was going to go far beyond information foraging. It was going to be so much more than a set of pages you browse through... It was going to be the engine of the economy. His bold prediction struck a note with me, so when I got back to the office the next morning, I turned to my team at the time, and I said: “Hey, we’re going to work on Web Search”.

Back then, Search was horribly broken... you’d be lucky to get what you were looking for after a dozen query attempts! Still, I thought it was amazing that people had access to so much information about virtually anything.

As I began to explore the Search problem more deeply, I realized something. The search for knowledge is a cognitive need that isn’t subject to computational limits. You could have all the computers in the world, and still, you might not build a better search engine. This blew my mind. And so, my team and I pursued search algorithms that presumed that we had infinite computing – we cast off our limits – and ended up with search that worked better, even if it was slow.

To this day, I remain inspired by the core promise of search - knowledge - and its ability to uplift the human condition. Just think. Two decades ago, the Web’s information was the equivalent of a single library. But today, the Web houses more information than all of the libraries in the world combined.

And what's more, it brings that information right to people's fingertips. Now, you can point your camera at a street sign in a different language and have it translated aloud. Or you can get walking directions in augmented reality. Or you can find COVID testing sites near you in an instant...And while all these things are possible today, there are a myriad of challenges still to be explored. In fact, we spend a great deal of time thinking about how to provide high quality answers to questions that haven't even been asked yet. So as you head into this next chapter of your life, pursue the ever-evolving, seemingly unsolvable problems. When you do that in pursuit of changing the world, you will change it for the better.

Today, we talked about limits, about the ones that others put on you, that you put on yourself, or that you might face in your quest for knowledge. So before I go, I want to share a quote from Buddha, given Patna's sacred history: "The mind that perceives the limitation is the limitation."

Aha! I could have given you a few minutes of your time back. Buddha summed it up perfectly. Except, I have to be honest. I searched for Buddha quotes on Google, and this came up as a top result for me. Alas, a different search debunked it. Thank you, Fakebuddhaquotes.com. Like I said, search is never going to be a solved problem. Still, even in a fake Buddha quote, there's a great deal of wisdom. "The mind that perceives the limitation is the limitation." So, let's break barriers, open up possibilities, and innovate for the future. If you take anything away from today, I hope you take this: Dare to defy limits, IIT Patna graduates, and you will do incredible things. Just imagine what you can do to change the world when you refuse to let limits hold you back.

Congratulations, and thank you for your time. Here's to a very bright future ahead!

Board of Governors

Chairman	
Dr. Anand Deshpande	IIT Patna
Ex. Officio Member	
Prof. Pramod Kumar Jain	Director, IIT Patna
Members	
Additional Secretary/ Joint Secretary	MHRD, Govt, of India
Principal Secretary	Department of Science & Technology, Govt. of Bihar
Principal Secretary	Department of Science & Technology, Govt. of Jharkhand
Prof. Kailash Chandra Sharma	Vice-Chancellor, Kurukshetra University, Kurukshetra (Haryana)
Prof. Yogesh Singh	Vice-Chancellor, Delhi Technological University (Formerly Delhi College of Engineering)
Dr. Mangesh V. Joshi	Managing Director, Sanrachna Structural Stenthening Pvt. Ltd,
Dr. Naveen Kumar Nishchal	Associate Professor, Dept. of Physics., IIT Patna
Mr. Vishwa Ranjan	Registrar, Indian Institute of Technology Patna

Associate Deans

Academics	Dr. Atul Thakur
Administration	Dr. Somanath Tripathy
Faculty Affairs	Dr. Mayank Tiwari
Research & Development	Dr. Jawar Singh
Student Affairs	Dr. Smriti Singh
Resource	Dr. Rishi Raj

Head of the Departments

Department of Chemistry	Dr. Sahid Hussain
Department of Chemical and Biochemical Engineering	Dr. Nitin Dutt Chaturvedi
Materials Science and Engineering	Dr. Anup Kumar Keshri
Department of Computer Science and Engineering	Dr. Jimson Mathew
Department of Electrical Engineering	Dr. Ahmad Ali
Department of Humanities & Social Sciences	Dr. Nalin Bharti
Department of Mathematics	Dr. Om Prakash
Department of Mechanical Engineering	Dr. Mohd. Kaleem Khan
Department of Civil Engineering	Dr. Ramakrishna Bag
Department of Physics	Dr. Venkata Ramanaiah Dantham

MEDALS AND PRIZES

INSTITUTE GOLD MEDAL

PRESIDENT OF INDIA GOLD MEDAL

This gold medal is to be awarded to the outgoing B. Tech. student of a batch who is adjudged to be the academically best, securing the highest CPI at the end of the 8th semester for B.Tech degree among the graduating students of all B.Tech courses.

PRESIDENT OF INDIA GOLD MEDAL, 2020

ASHUTOSH MISHRA
(1601ME09)

PRESIDENT OF INDIA GOLD MEDAL, 2021

UMANG JAIN
(1701CS56)

DIRECTOR'S GOLD MEDAL

This gold medal is to be awarded to the outgoing B.Tech student of a batch who is adjudged to be the best all-rounder [academic record/CPI in semester examination, activities in the department, activities in the hall of residence, and performance under student Gymkhana (sports and social and cultural activities)] at the end of 8th semester for B.Tech degree from among the graduating students of all B.Tech courses.

DIRECTOR'S GOLD MEDAL, 2020

ANUSHREE JAIN
(1601CS54)

DIRECTOR'S GOLD MEDAL, 2021

VATSAL SINGHAL
(1701CS52)

CHAIRMAN'S GOLD MEDAL

This gold medal is to be awarded to the outgoing M. Tech. student of a batch who is adjudged to be the academically best, securing the highest CPI at the end of the 4th semester for M.Tech degree among the graduating students of all M.Tech courses.

CHAIRMAN'S GOLD MEDAL, 2020

DIVYA GROVER
(1811CE07)

CHAIRMAN'S GOLD MEDAL, 2021

SUBHADIP BHANDARI
(1911MM15)

ARYABHATTA GOLD MEDAL

This gold medal is to be awarded to the outgoing M. Sc. student of a batch who is adjudged to be the academically best, securing the highest CPI at the end of the 4th semester for M.Sc. degree among the graduating students of all M.Sc. courses.

ARYABHATTA GOLD MEDAL, 2020
