Dr. Sweta Sinha, HSS, IIT Patna

Description

The humanities and social sciences are those academic disciplines that study humanity and its interaction with its environment including but not limited to literature, language, culture, economic and political activities, artifacts and how the surrounding issues are communicated and perceived by the users. Media has always played a very crucial role in serving as the most significant and pervasive channel which serves not only to influence human mind and cognition but also shape realities. It is important to understand the nuances of media and communication studies in order to inculcate a more critical thinking along with understanding the concepts in this domain which make this entire field of study hugely popular and sought after. From social networking sites to lifestyle magazines to social movements and computer gaming, due to the popularity and rampant usage of technology, this domain of interface study has become very pertinent.

Objectives and Outcomes

The objective of the course is to introduce some of the crucial and significant concepts and issues related to media studies and media appropriate communication strategies. The course also aims to debate and discuss the influence of media communication in shaping and altering human cognition as well as perception. The course aims to upgrade the existing knowledge of the participants so that their ability to think critically in issues related to this domain develops. The course also intends to highlight prospective areas of research for future researchers.
