

ICISS: 17th International Conference on Information Systems Security, 2021

17-19 December, 2021 | at Indian Institute of Technology, Patna

<https://www.iitp.ac.in/~iciss2021>

Patron

T.N. Singh, Director, IIT Patna, India

General Chair

R.K. Shyamasundar, IIT Bombay, India

Technical Program Co-Chairs

Rajiv Ranjan, Newcastle Univ, UK
Somanath Tripathy, IIT Patna, India

Organizing Chair

Jimson Mathew, IIT Patna, India

Publicity Chairs

Vishwas Patil, IIT Bombay, India
N. V. Narendra Kumar, IDRBT, India
Devki Nandan Jha, Oxford Univ, UK

The **International Conference on Information Systems Security (ICISS)** is a 17-year old forum for the dissemination of research results related to all areas of computer security and privacy. The conference is held annually in India. The next edition will be held during December 17-19, 2021 in the historic city of Patna.

Call for Papers: ICISS solicits previously unpublished research in all areas of security and privacy including building, experimenting with and attacking secure systems, techniques and tools for security analysis and theoretical topics related to security. We encourage submissions from academia, industry and government. Over the past several years, the average acceptance rate is less than 30%. The past proceedings of the conference are published by Springer Verlag as part of their LNCS series. The same tradition will follow.

Topics of interest include but are not limited to:

Access control	Language-based security	Operating systems security
Key management	Application security	Privacy and anonymity
Audit	Secure data streams	Cyber-physical systems security
Malware analysis	Authentication	Vulnerability detection or mitigation
Biometric security	Network security	Sensor and ad-hoc network security
Cloud security	Usable security	Distributed systems security
Web security	IoT Security	Data security and privacy
Security testing	Digital forensics	Intrusion detection and recovery
Software security	Smartphone security	Digital rights management
Threat Modeling	Identity management	Formal models of security
AI for Security	Security for AI	Blockchain and cryptocurrency
Digital payments	Botnets and Honeypots	Machine learning security

Paper Submission

Regular papers, which present mature, complete research results. These papers should be at most 20 pages in length, including bibliography.

Work-in-progress (WiP) papers for early dissemination of research that is not yet complete. These papers should be at most 12 pages in length, including bibliography. WiP papers must clearly identify the goals of the work and the technical approach, and include enough initial development to demonstrate viability of the approach. The title must be prefixed with "WiP:" to clearly indicate that the submission is a WiP paper.

Papers must be written in English and submitted in the Springer Verlag LNCS **Latex** or **Word** style in PDF format, via this [Submission link](#). The review process is single-blind, meaning that author names will be visible to reviewers. The conference proceeding will appear in Springer's LNCS series. The extended versions of selected and accepted papers will be invited for publication in the **Indian Academy of Sciences' journal-SADHANA**. ICISS will also have a best paper award.

Submission Deadline: 22nd Aug, 2021 (AoE)

Final Notification: 30th Sep, 2021
